In Cortinadecor we offer you 5 different types of models of confection for your curtains. Ojales, Presillas, Tres Pliegues, tablas fruncido. Later we show how you must measure his curtains, for any of the models of confection that Cortinadecor offers you.

Important: Cortinadecor will apply the fabric necessary for every type of confection.

TRES PLIEGUES

OJALES

FRUNCIDO

TABLAS

PRESILLAS

HOW TO MEASURE THE WIDTH OF MY CURTAIN?

Measuring my curtains is important bear in mind that if already we have bar of curtain or installed rail we will measure the width of the same ones, but if still we do not have anything installed it is advisable to measure the width of the window and add from 15 to 20 cm to every side of the window frame.

15 to 20 cm

15 to 20 cm

HOW TO MEASURE THE HIGH PLACE OF MY CURTAIN?

To measure the high place of my curtains we must do it from where my bar is placed up to where I want that my curtain comes, but as in the previous case if I do not have anything installed . I will have to measure from the top frame of the window adding between 15 and 20 cm up to where I want that my curtain comes.

If my curtain is installed to the ceiling, I will have to measure from the ceiling up to where I want that my curtain comes.
